PROJECTS

Sanchari - Travel Planning App

Developed an app for planning trips using integrated Gemini API for personalized recommendations. Recommends based on budget provided.

– **React Native, Firebase, Gemini API, Expo, Google Maps API, OpenWeatherMap API, Tailwind CSS**

COVID-19 Report

Built Power BI report that provides an analysis on COVID-19, using visualizations. Loaded data from Amazon S3 into Snowflake and then into Power BI. Used Power-Query to clean and prepare data.

– **Power BI, Snowflake Data Warehouse, AWS S3, Power Query, DAX**

Sports-Scheduler Web App

This is a Sports Management System that allows administrators to manage sports and sessions, and players to join sessions. This includes Player and Admin authentications and respective dashboards.

– **EJS, Node.js, Express.js, PostgreSQL, Passport.js, Bootstrap**

Basic Search System - Amazon Dataset

Created a general product search system on Amazon dataset that searches and recommends the top 10 products based on user preferences. This even works

when the words are mis-spelt.
